

Workforce Insight has unmatched expertise in helping clients maximize their investment in Kronos workforce management solutions - from needs assessment through implementation, training, change transformation and deployment.

More specifically, we help Kronos clients realize the full potential and generate higher returns.

Whether customers have just purchased Kronos, are mid-way through an implementation, or long-time users, Workforce Insight helps clients achieve maximum value from their investment.

New Kronos Customer?

Kronos solutions provide an unparalleled platform to engage the workforce and deliver upon labor management objectives. Workforce Insight's consultants provide guidance in addressing the critical questions that directly impact the success of Kronos projects and the associated ROI, including:

- Is the project aligned with senior management goals?
- Are all stakeholders truly represented?
- Is the organization ready for the change transformation required?
- What is your strategy for communicating this change to the workforce?

Implementation Underway?

Workforce Management solutions present a set of unique challenges not found with other software implementations. For starters, very few other solutions affect every employee in the organization. More importantly, this application has the potential to impact employees on a personal level – their paycheck and their work schedule. To reduce the risk of this undertaking, Workforce Insight delivers a team of highly seasoned professionals with unmatched expertise and best practice success.

Long-time Kronos Customer?

It may have been months or even years since the greatest effort associated with your implementation was complete. The product works – you've reduced paper-work, lowered payroll inflation, seen some returns from your investment, but:

- Has your organization changed?
- Is your corporate strategy the same as when you started your implementation
- Are you just collecting timekeeping punches or are you truly managing your workforce?

Workforce Insight provides visibility to the greatest opportunities to leverage technology investments in Kronos—helping clients better align their workforce with organizational goals.
